

Stadler Form®

TRENDETTTER | Summer 2025

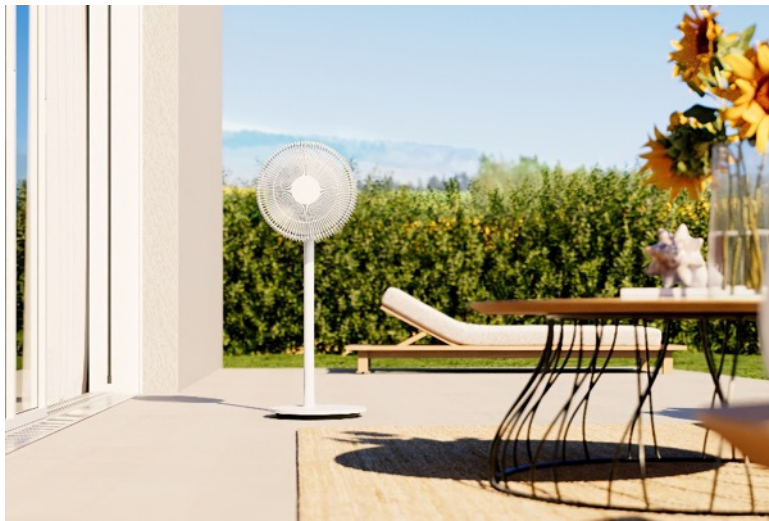

Fresh breeze for warm days

Stadler Form presents the fans Finn mobile, Peter, Simon and Tim

When temperatures rise outside and the air inside becomes stagnant, it's not just your well-being that suffers – your concentration and sleep quality are also thrown off balance. The stylish fans from Stadler Form not only bring a breath of fresh air into rooms, but also add an aesthetic touch. With their modern design, efficient performance and quiet operation, they promote pleasant air circulation and make everyday life easier. From mobile freshness companions to down-to-earth roommates, these models bring refreshment exactly where it is needed most.

Finn mobile – the outdoor fan with rechargeable battery

Finn mobile is the mobile fan that can also be used in covered outdoor areas thanks to his rechargeable battery and IP44 certification – ideal for balconies and terraces. With up to 7 hours of battery life, eight wind speeds and a 120° automatic swing function, he brings pleasant refreshment wherever he goes. The night mode ensures whisper-quiet airflow at night, while the 1 to 8-hour timer switches the device off automatically when needed. Whether used as a table, floor or pedestal fan, Finn mobile is highly flexible and particularly energy-efficient. A battery level display and practical remote control make him the ideal seasonal favourite.

Peter – the down-to-earth fan with a gentle breeze

Peter is the tower fan for anyone who appreciates clean lines and useful features. With his slim, pillar-like design, he takes up very little space and blends discreetly into any living or working environment. Peter now comes with an energy-efficient DC motor, which is not only quieter but also more powerful. At the lowest setting, he uses up to ten times less electricity and offers over 10 % more power than before. Six individually selectable speed settings and dimmable LEDs ensure pleasant, quiet refreshment, even in the bedroom. Available in three colour options, the tower fan blends harmoniously into

any interior. Thanks to the remote control, he can be conveniently operated from the sofa, bed or desk – a reliable roommate who helps you keep your cool.

Simon – the 3D fan with character and a new design

Simon is a 3D air circulator that impresses with his modern textile cover and technical details. He is now even taller, standing at 1 meter, which improves air distribution at an optimal height and gives him a more elegant look. The 3D oscillation ensures all-round refreshment with a wind distance of up to 10 meters – and all this with particularly quiet operation. Ten speed settings, a natural breeze mode, a timer (1 to 7 hours) and a magnetic remote control offer a high level of user comfort. The washable textile cover and removable grille make cleaning easy. Simon is the quiet, style-conscious fan that combines functionality and aesthetics for pleasantly cool moments.

Tim – the simple solution for indoors and on the go

Tim is the practical fan for anyone who doesn't want to go without refreshment – whether at home, in the office or when travelling. Thanks to his USB port, he can be easily connected to a notebook, power bank or power supply. The fan ring can be rotated and tilted by hand to ensure targeted air circulation according to individual needs. The stepless control switch offers precise regulation of the

airflow intensity – from a gentle breeze to a powerful gust. Tim is particularly quiet at low settings. Compact, lightweight and easy to transport, Tim is the perfect everyday companion for hot days.
