

# Stadler Form®

PRESS RELEASE | October 2023

## **New product launch: Elegant Nora enchants with fragrance and flame** Stadler Form presents the mobile aroma diffuser lady with bamboo for indoors and outdoors

**Nora, the latest addition to the Stadler Form family, embodies elegance and enriches the world of living. The mobile aroma diffuser lady with flame effect for indoors and outdoors is available from 17 October 2023. With the perfect combination of natural bamboo and high-quality aluminium, Nora is far more than just a diffuser: she is a decorative object that harmoniously combines aesthetics and functionality and scents any room or outdoor area. Thanks to the atmospheric flame effect and a selection of versatile fragrance oils, Nora is an indispensable companion on autumn and winter evenings.**

### **Versatile functionality for flexible applications**

Thanks to her battery operation, Nora can be used wherever an atmospheric ambience is desired. During yoga exercises, when relaxing and meditating or during a candlelight dinner, the new product from Stadler Form delights with her amber-coloured flame effect and at the same time spreads a pleasant fragrance. The warm amber light creates a cosy atmosphere that is perfect for relaxing hours. The aroma diffuser lady with bamboo cladding has a splash-proof function and can therefore also be used in covered outdoor areas. The battery lasts for up to 7 hours, which is why Nora is also suitable as a companion for long evenings indoors and outdoors. Depending on the mood, the light can be dimmed or switched off completely. Whether in the living room, dining room or on the balcony - she provides a fragrant environment everywhere and can be used as a candle substitute on a beautifully set table.

## Stadler Form CEO Martin Stadler explains

### What makes Nora so special?

"Nora is more than just an aroma diffuser. She is a statement for sophisticated design, naturalness and fragrance enjoyment. We have deliberately avoided as much plastic as possible in the production and packaging in order to offer an environmentally friendly product that also meets the highest aesthetic standards. Sustainability plays a decisive role in the development of all Stadler Form products. Therefore, the cladding of Nora's housing is made of FSC-certified bamboo. The interplay of natural with noble materials thus gives the diffuser lady her timeless appearance. Moreover, the natural grain of the bamboo makes each Nora unique. The versatile usability in covered outdoor areas as well as in interiors is another special feature."

### For which situations was Nora created?

"Nora is the ideal companion for cosy hours in the cooler season, but also adds a magical touch to balmy late summer evenings. Whether as a decorative element on the dining table, as atmospheric lighting while reading or as a soot-free and safe candle substitute - Nora brings design and relaxation to every round."

## How does Nora work?

"Nora can be used with any alcohol-free essential oil. Using ultrasound technology, she disperses the fragrance with an extra fine mist. The amber-coloured light of the Amber Light™ creates a golden play of flames through the cool mist. The handling is very simple: fill in water and add two to three drops of fragrance oil. There are five different natural fragrances to choose from: Recharge, Refresh, Relax, Relief and Repel."

[Aroma Diffuser Nora](#) from Stadler Form, current webshop price CHF 79.-  
[Essential oil](#) from Stadler Form, current webshop price CHF 9.90 each.
